EXPERIENCE

december 2024 – Nowadays
Back-end Developer - Freelancer

I develop and maintain scalable APIs in Node.js for various projects, ensuring efficient integration between backend, frontend, and mobile applications. I have experience implementing cloud-first solutions using Google Cloud and AWS to optimize performance and availability.

june 2022 – april 2023
IT Assistant - City Hall

I worked in the maintenance and technical support of internal systems, ensuring the stability of applications used by administrative sectors. Additionally, I was involved in the development and optimization of APIs and intranets. I worked directly with databases on Windows Server systems, optimizing queries and ensuring data security.

october 2019 – february 2020
Intern – Electoral Justice, 9th Zone

I provided customer service, assisting citizens with electoral processes, issuing voter registration cards, and updating records. I provided administrative support by organizing documents and managing bureaucratic processes, ensuring compliance with Electoral Justice regulations. During this period, I developed communication skills and efficiency in handling administrative tasks, contributing to the smooth operation of the electoral office..
